

PHOTOSHOOT #6

For this assignment you will produce two 8x10 photographs. These photos will be sized to 8x10, and completely edited in Photoshop. The photos may NOT be produced in Black and White.

Photo #1 Thanksgiving/Harvest

This photo is to capture the spirit and feeling of an American Thanksgiving or Fall Harvest. The photo must show the season in an exciting and dynamic way. Mood, tone and lighting must come across to the viewer. Consider that the image should be suitable for a Hallmark Greeting card. This photo is to be a stand alone shot (the photo comes as is from the camera) with all editing done only in Lightroom.

Photo #2 “By the light of the silvery moon”

This photo (finished as an 8x10 jpg) is to convey the feeling of moonlight. What is lit by moonlight is entirely up to you. Moonlight conveys the feeling of romance, mystery, and nostalgia. This photo, while shot with a camera, should be edited in Photoshop. You may (should) create some effect, generate some form of impact, using Photoshop skills. Naturally, you will document and show how you accomplished this using screen captures and samples from Photoshop.

Note:

Each photo will be saved in jpg format and titled either Thanksgiving or Moon and placed in a folder titled Photoshoot #6 on your flashdrive.
